

MESSAGE FROM PHP LADIES FOUNDER:  
**JENNIFER BET-DAVID**

There has never been a better time for women to be in business. At PHP Agency women have an unparalleled opportunity to build a business for themselves. We are changing the face of the traditionally male dominated industry. Today more than 50% of PHP's agents are women and our goal is to continue attracting more ambitious women who want to help educate families on money matters and use their gifts to make a difference in their communities. If you want to be a part of an inspiring movement of like-minded women that will continue to set the pace for the next generation of leaders, then PHP Agency is the place for you!

Most successful women in PHP do not have previous experience in financial services. Meet our Leaders and learn about their previous backgrounds.
